Subject Fw: former IntelliData facility

Bob --

Below is the e-mail I had sent you previously requesting that you send in a completed "Migration of Contaminated Groundwater Under Control" environmental indicator form when you report the data from the geophysical work, waterloo profiling and monitoring well installation that is planned for this month at the former IntelliData facility. Please send in the completed checklist and supporting data **by the end of August 2008**. I have attached the completed Current Human Exposures Under Control environmental indicator form for the former IntelliData facility so that you can see the level of detail we typically like to see.

In the previous e-mail, I had also requested that you complete the attached environmental indicator form (attached to forwarded e-mail below) with the data that you currently have for the project and send it to EPA by **June 30, 2008**, as a preliminary draft. Since June 30 is rapidly approaching, please send me this preliminary draft by **July 11, 2008**. In the preliminary draft, please identify any data gaps that are intended to be filled by the fieldwork proposed for this summer.

Thanks Bob. Please let me know if you have any questions.

Subject former IntelliData facility

Bob -

This is to follow-up on our phone call last week regarding the former IntelliData facility at 80 Pickett District Rd. in New Milford, CT.

I understand from our conversation that your plan is to complete the fieldwork proposed in ERM's June 19, 2007 proposal in late June/early July and to report the results to EPA by the end of July 2008. When you report the results of this work to EPA, please also send in a completed "Migration of Contaminated Groundwater Under Control" environmental indicator evaluation form (attached) reflecting the data collected to date for the former IntelliData facility project.

To help keep the project moving toward EPA's target of meeting the groundwater environmental indicator by September 30, 2008, please complete the attached form with the data that you currently have for the project and send it to EPA by **June 30, 2008**, as a preliminary draft. In the June 30 iteration of the environmental indicator form, please identify any data gaps noted that are intended to be filled by the fieldwork proposed for this summer.

Please let me know if you have any questions on the attached form. Thanks very much Bob, Stephanie
